

Owusu Kenneth

Accra, Ghana

Phone: 0559182794

Full-Stack Engineer | AI and LLM Application Engineer

Email: owusukenneth77@gmail.com

GitHub: github.com/Owusu1946

Professional Summary

Tech-focused full-stack engineer building production web and mobile applications with modern TypeScript stacks and pragmatic AI integration. Founder of OptiMediX and builder of Orin, with experience delivering user-facing products, internal dashboards, and reusable templates. Strong bias for clean UI, fast iteration, and dependable systems.

Core Skills

- Frontend: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, React Native (Expo)
- Backend: Node.js, Python, Django, FastAPI, REST APIs, WebSockets, GraphQL (working knowledge)
- Data: PostgreSQL, MongoDB, Redis
- AI: Prompt engineering, LLM app development, LangChain, OpenAI and Anthropic integrations, Hugging Face tooling
- Cloud and DevOps: AWS, Google Cloud, Docker, Kubernetes, CI/CD fundamentals
- Product Engineering: system design, testing mindset, performance tuning, secure-by-default habits

Experience

Web Application Engineer | Ghana Atomic Energy Commission (GAEC) | Dec 2025 to Present

- Build and maintain internal web applications and dashboards for operational workflows.
- Collaborate with stakeholders on requirements, delivery timelines, and iteration cycles.

Senior Software Engineer | Pic Konnect | May 2023 to Present

- Develop and ship full-stack features for a social platform focused on visual sharing.
- Improve reliability and performance through refactors, observability, and cleaner deployment workflows.

Founder and Lead Engineer | OptiMediX | Mar 2020 to Present

- Leading the build of a digital health platform combining AI-assisted diagnostics, telemedicine, and logistics.
- Prototyped patient-facing flows including symptom tracking, medication reminders, and pharmacy fulfillment.
- Drive product direction, architecture choices, and engineering execution from concept to MVP.

Senior Web Developer and Facilitator | Ghana Investment Fund (GIFEC) | Nov 2021 to Dec 2022

- Delivered web solutions and provided technical facilitation and support to teams and stakeholders.

Selected Projects

Orin (private) - AI multi-agent no-code builder

- Building an AI-powered workspace where specialized agents plan, build, test, and optimize apps collaboratively.
- Focus areas: reliable code generation, QA via browser simulation, security review, and performance-cost optimization.

Docsage and Docsagev2 - AI-powered README generator

- Built tooling to generate structured READMEs from repository context and project metadata.

React Native Auth Template - Expo starter with Supabase

- Reusable Expo template with authentication scaffolding and production-friendly project structure.

Google Meet Clone

- Real-time communication clone project exploring modern web real-time primitives.

eMart - AI-powered multivendor ecommerce platform

- Full-stack ecommerce build with scalable architecture patterns and a clean admin experience.

Education

Bachelor of Technology (BTech), Information Technology | Tamale Technical University | 2021 to 2025

Relevant focus: web technologies, responsive web design, and applied software engineering.

WASSCE | Kumasi High School | 2017 to 2020

Certifications and Awards

- CISCO Networking Essentials
- Software Developer of the Year (Award, 2023) - TEA
- Additional certificates: CCTV installation, web development, networking and entercom

Languages

- English
- Akan
- Fanti
- Dagbani
